7.3.2. "SOS" and "OK" signaling principles

By pressing a "SOS" button a crew reports an accident and requests an immediate assistance. In this case, it is obliged to inform the Rally HQ, call the telephone number indicated on the label.

In case of an accident or technical problems during SS, by pressing an "OK" button a crew informs of the stop for more than 30 seconds and that immediate assistance is not required (even if a crew is trying to continue the rally).

Attention! In case of stopping at SS, the device sends a "SOS" signal and the crew within 30 seconds must press "OK" button to remove the "SOS" signal sent by the system. A mobile phone of the crew must be switched on (or turned on in 60 seconds) so the rally security and monitoring centre can reach the crew.

Competitors must follow the instructions of the Marshals and their violations will be reported to the Steward. In these stages, the competitors must wear helmets and their use will be controlled by track Marshals. Disappointments will be reported to the Steward.

8.1.2 Regularity stages (RS) without presence of Marshals.

These stages in the itinerary will be marked as "Open Stage". This means that the competitors will start at these stages by themselves and according to order and timetable of the itinerary.

The time target in the timetable in brackets, such as h (xx: xx), should be added to the current registration time in the previous time control (TC / TC). This time for the competitor is a start time for the regularity stage according to the roadbook.

The competitor must start independently at the specified regularity stage according to the competition road book and itinerary. The Organizer will treat each competitor's individually calculated start time as the time from which the results of the regularity stage will be calculated.

The competitor may arrive at the regularity stage start not earlier than 59 seconds before his start time and must release the start zone immediately after the start time. Competitors who arrive at the start inappropriately do not interfere with other competitors.

8.2. Average speeds in regularity stages.

In regularity stages (RS), with the presence of Marshals, average speeds will be set up to **70km/h**, and drivers must wear helmets. Protective helmets should be worn and locked throughout the regularity stage while the car is in the motion. Any violations will be reported to the Steward.

It is only possible to record the actual time and record it on the timecard (carnet) only if both – the crew and car are in the control area and in the immediate vicinity of the control point. The check-in time is fixed at the time when one of the crew's drivers submits a timecard (carnet) to the respective Marshal.

For each difference between the actual registration time and the scheduled time of registration, the crew is penalized as follows:

- b) for early arrival: 20 penalty seconds per minute or part of a minute.

8.4.2. Stage start (RS start) with presence of Marshals:

At the time control at the finish of a road section, the appropriate marshal will enter on the time card both the check-in time of the crew and its provisional stage start time. There must be a 3-minute gap to allow the crew to prepare for the stage start and come to the start line. The stage start time shall then be the start time for calculating the check-in time at the next time control.

8.4.3. Stage finish (RS finish) with presence of the Marshals:

Regularity stage ends with flying finish and stopping between the yellow warning sign and the stop sign is forbidden and will be reported to the Steward. The crew must report to the stop point indicated by a red "STOP" sign to have its finishing time entered on the timecard (hour, minute, second, and tenth of a second). At Stop point can be written in the timecard other stage times also.

8.4.4 Start procedure on regularity stages with presence of the marshals:

- On the start position the crew stops when instructed by marshals;
- When the start marshal confirms the car is on the right start position – 40 cm before electronic controlled start line the car must stay immovable till start moment and the team must visual follow the light signal of light shield;

- On the light shield the time will be shown;
- 30 seconds before start the marshal passes to co-driver the timecard;
- 25 seconds before start on the shield will be shown the remainder seconds till start;
- The last 5 seconds of the pre-start minute are marked with five red light signals. When all signals go out, the road for start is free;
- If the crew's car cross the electronic controlled start line before the red lights go out, false start will be fixed automatically which will flash in with 5 seconds delay, penalization for false start accordingly. The start marshal makes the final decision about false start and notes this in the start report;

8.4.5. Flying middle finish lines on regularity stages (RS mid-finish):

On the regularity stages will be certain amount of flying middle finish lines. Results will be fixed on these line as electronical beams, by chronometers or GPS results. About finish of the stage will be reported by flying finish sign- "checked flag" on red background

- for deviation (delay or early arrival) from ideal time: 1 penalty second for 0.1 second of deviation;
- on the first fixed average speed early arrival of more than 20% of ideal time, penalty 3,000 penalty seconds;
- on a re-recorded average speed early arrival of more than 20%, penalty up to disqualification from competition.
